REC_DS using C_Week 6_MCQ_Updated_1

Attempt : 1 Total Mark : 20 Marks Obtained : 19

Section 1: MCQ

1. Consider the Quick Sort algorithm, which sorts elements in ascending order using the first element as a pivot. Then which of the following input sequences will require the maximum number of comparisons when this algorithm is applied to it?

Answer

22 25 56 67 89

Status: Correct Marks: 1/1

2. Is Merge Sort a stable sorting algorithm?

Answer

Yes, always stable.

Status: Correct Marks: 1/1

3. Which of the following modifications can help Quicksort perform better on small subarrays?

Answer

Switching to Insertion Sort for small subarrays

Status: Correct Marks: 1/1

4. Which of the following statements is true about the merge sort algorithm?

Answer

It requires additional memory for merging

Status: Correct Marks: 1/1

5. What is the main advantage of Quicksort over Merge Sort?

Answer

Quicksort requires less auxiliary space

Status: Correct Marks: 1/1

6. In a quick sort algorithm, where are smaller elements placed to the pivot during the partition process, assuming we are sorting in increasing order?

Answer

To the left of the pivot

Status: Correct Marks: 1/1

7. Which of the following sorting algorithms is based on the divide and conquer method?

Answer

Merge Sort

Status: Correct Marks: 1/1

8. Why is Merge Sort preferred for sorting large datasets compared to Quick Sort?

Answer

Merge Sort has better worst-case time complexity

Status: Correct Marks: 1/1

9. Which of the following methods is used for sorting in merge sort?

Answer

merging

Status: Correct Marks: 1/1

10. In a quick sort algorithm, what role does the pivot element play?

Answer

It is used to partition the array

Status: Correct Marks: 1/1

11. Which of the following strategies is used to improve the efficiency of Quicksort in practical implementations?

Answer

Choosing the pivot randomly or using the median-of-three method

Status: Correct Marks: 1/1

The following code snippet is an example of a quick sort. What do the

```
'low' and 'high' parameters represent in this code?
  void quickSort(int arr[], int low, int high) {
     if (low < high) {
       int pivot = partition(arr, low, high);
       quickSort(arr, low, pivot - 1);
       quickSort(arr, pivot + 1, high);
  }
  Answer
  The range of elements to sort within the array
                                                                     Marks: 1/1
  Status: Correct
  13. Which of the following is not true about QuickSort?
  Answer
  It as an adaptive sorting algorithm
  Status: Wrong
                                                                      Marks: 0/1
  14. Merge sort is
  Answer
  Comparison-based sorting algorithm
  Status: Correct
                                                                      Marks: 1/1
  15. What happens when Merge Sort is applied to a single-element array?
  Answer
  The array remains unchanged and no merging is required
  Status: Correct
                                                                      Marks : 1/1
16. What happens during the merge step in Merge Sort?
```

Answer

Two sorted subarrays are combined into one sorted array

Status: Correct Marks: 1/1

17. Let P be a quick sort program to sort numbers in ascending order using the first element as a pivot. Let t1 and t2 be the number of comparisons made by P for the inputs {1, 2, 3, 4, 5} and {4, 1, 5, 3, 2}, respectively. Which one of the following holds?

Answer

t1 > t2

Status: Correct Marks: 1/1

18. What is the best sorting algorithm to use for the elements in an array that are more than 1 million in general?

Answer

Quick sort.

Status: Correct Marks: 1/1

19. Which of the following is true about Quicksort?

Answer

It is an in-place sorting algorithm

Status: Correct Marks: 1/1

20. Which of the following scenarios is Merge Sort preferred over Quick Sort?

Answer

When sorting linked lists
